

Principles of Ayurveda

Preface

Science is advancing by leaps and bounds. With recent scientific advances, our understanding of Universe as well as of man is much better today. However, more we know about the intricacies of human life, more we realise how much more we are yet to know. Student of modern medicine can rattle out the functions of various organs like heart, kidneys, liver, brain etc. very well. However if he is asked a simple question viz. what are the functions of man ?, he is taken aback.

From time immemorial, Ayurveda has given guidelines and will continue to give guidelines to mankind about the art of living, science of health and philosophy of life. Ayurveda has studied man in relation to the Universe and has come to the scientific conclusion that man is the epitome of Universe. All objects in the Universe right from energy particles to huge celestial bodies and from microbes to man are derived from the same basic elements. Maintaining the consistency of the physical as well as biological elements in the body i.e. milieu interior constitute the basic function of physicians.

Ayurveda, the science of life aims at attaining ideal physical, mental and spiritual health. One can acquire physical health by following Swasththa-vrutta i.e. daily and seasonal regimen. One can develop strong mind by following Sat-vrutta i.e. rules of good conduct. One can attain spiritual health by understanding the true nature of self and his relation to the Universe as well as by developing a philosophical attitude.

Principles of Ayurveda are eternal truths, as they are based on sound scientific facts. Understanding 'Principles of Ayurveda' will not only help mankind to live a better life, but will also help all the present as well as future scientists and research workers in understanding and unravelling the mysteries and intricacies of human life in a better way. 'The mind is the man' says Bacon. Human mind has mysterious powers. Mind has no limits or bounds for its development. It is up to us to develop or degrade our mind. It can convert an enemy into a friend, a moment into years, a hell into heaven and man into almighty. The philosophy of Ayurveda stresses the importance of utilising mind, the most powerful instrument of man as given in the following prayer,

**"From unreal, lead me to the real.
From darkness, lead me to light.
From ignorance, lead me to knowledge.
From death, lead me to immortality."**

Index

| | |
|-----------------------------|----|
| Chapter 1 : Ayurveda | |
| 1. Definition of Ayurveda | 11 |
| 2. Life | 17 |

| | |
|--|----|
| 3. Origin of Ayurveda | 20 |
| 4. Base of Ayurveda | 24 |
| 5. Aim of Ayurveda | 25 |
| 6. Specialities in Ayurveda | 26 |
| Chapter 2 : Man and Universe | |
| 1. Introduction | 36 |
| 2. Composition of Universe | 37 |
| Chapter 3 : Philosophy and goals of Ayurveda | |
| 1. Philosophy of Ayurveda | 57 |
| 2. Role of Ayurveda | 58 |
| Chapter 4 : Medical education and ideal Physician | |
| 1. Selection of text books | 62 |
| 2. Selection of teacher | 63 |
| 3. Student | 64 |
| 4. The medical student | 65 |
| 5. Advice at convocation | 66 |
| 6. Physician - Doctor | 67 |
| 7. Consultant - Specialist | 67 |
| 8. Teacher | 68 |
| 9. Medical research worker | 69 |
| 10. A learned man | 69 |
| 11. Philosopher | 70 |
| Chapter 5 : Origin of various constituents and qualities of body and mind | |
| 1. Constituents and qualities of body and mind | 73 |
| 2. Embryological development of various organs | 74 |
| Chapter 6. : Psychological constitution | |

| | |
|---|-----|
| 1. Sattva - Raja - Tama | 79 |
| 2. Trigunatit | 83 |
| 3. Purushottam - Ideal person | 84 |
| 4. Diet and mental activity of brain | 85 |
| Chapter 7 : The fi ve basic elements | |
| 1. Panchmahabhootas | 91 |
| 2. Panchabhoutik constitution | 94 |
| 3. Selection of medicine and therapeutic measures | 99 |
| Chapter 8 : Origin of basic biological elements | |
| 1. Five casual elements | 104 |
| 2. Subtle elements | 104 |
| 3. Gross elements and their pentads | 105 |
| 4. Formation of Vata, Pitta and Kapha molecule | 106 |
| 5. Formation of Vata, Pitta and Kapha in the body | 111 |
| 6. Vata, Pitta and Kapha as molecular dhatus, doshas and malas | 112 |
| | |
| 7. Similars increase similars in the body | 113 |
| 8. Effect of food on mind, sense organs and motor organs | 115 |
| Chapter 9 : Biological elements | |
| 1. Kapha | 117 |
| 2. Vata | 119 |
| 3. Pitta | 122 |
| Chapter 10 : Constitution | |
| 1. Prakruti (Based on Tridoshas -Vata, Pitta & Kapha) | 134 |
| Chapter 11 : Increase or decrease in Vata, Pitta and Kapha | |
| 1. Aetiological factors | 151 |

| | |
|---|------------|
| 2. Clinical manifestations | 154 |
| 3. Treatment | 157 |
| 4. Doshas and diet | 159 |
| Chapter 12 : Permutations and combinations of doshas | 170 |
| Chapter 13 : Manifestations of diseases caused by three doshas | 176 |
| Chapter 14 : Tridosha theory and modern medicine | 186 |
| Chapter 15 : Tissues - Dhatus | |
| 1. Nourishment of dhatus | 190 |
| 2. Rasa - body fluids | 195 |
| 3. Tissue tonics | 226 |
| 4. Dhatusara - tissues of good quality | 229 |
| Chapter 16 : Mala - waste products | |
| 1. Urine | 270 |
| 2. Purish - faeces | 275 |
| Chapter 17 : Dosha, dhatu and mala | 285 |
