

# Autohypnotherapy for psychological disorders such as mania, depression, etc.

## Preface

Text series on Autohypnotherapy (4 Volumes) categorises a disease as physical or psychological depending on the symptoms and not on the reasons; for example, most sexual disorders are psychological in origin; but they show physical symptoms and hence, are included in physical illnesses.

A patient can treat himself when the ailment is in initial stage. When a physical ailment is at an advanced stage, a patient cannot treat himself. At such times, a knowledgeable and dedicated individual can study Hypnotherapy and treat him. To simplify this process, examples of treatment given in various physical and psychological ailments are elaborated in this Text. This will guide the reader appropriately in the actual treatment.

### 1. Objective of compiling a Text on articles published in different Periodicals some years ago

From 1984 to 1990, we (Dr Jayant Athavale and Dr [Mrs] Kunda Athavale) published a series of articles on physical and psychological diseases in various Periodicals such as Sahyadri, Lokprabha, Sarvajani, Mumbai Sakal, Gavkari, etc. This Text is based on those articles. In 1995, I quit practicing as a Hypnotherapist and commenced spiritual practice. Besides, no new techniques of Hypnotherapy and its effects have been discovered so far; hence, old extracts have been used as they are not outdated. This is akin to the modalities of spiritual practice - they are never outdated.

### 2. Selection of examples

- A. 'A patient was cured after 8 to 10 visits over a period of 4-5 months' - Readers will not be able to learn from articles which give examples of such patients. There are others who have to be treated in specific ways for over a year. There is much to learn from such long-term treatment of a psychiatric patient. This Text elaborates on such long-term treatment.
- B. Some of our patients had been suffering for 10 to 12 years. The success story of these chronic cases would assure other patients - 'If they can get cured by Hypnotherapy we too will in a much shorter time'. This was another reason for publishing articles on these chronic cases.

### 3. Study the entire series of Texts

Some aspects of the subject such as how to use this science to treat a patient or self, ups and downs of treatment, etc. have been elaborated in this Text using case studies. Though the information on treatment is disease-specific, it can be applied to any other disease. Therefore, instead of reading the Text in parts, meaning only that section which pertains to treatment for a particular disease, read the entire Text; rather, the entire Text series. As a result, you will learn to overcome the problems that arise during the treatment.

If a patient cannot concentrate on treatment because of physical or mental disorders, it becomes difficult for him to treat himself or get treated. At such times, perform the other remedies mentioned in 'Sanatan's text

series useful for the adverse times' to reduce the severity of the suffering and then start Hypnotherapy. My prayer unto the Holy feet of Shrikrushna is - 'May many people develop interest in studying this mode of treatment'. - **Paratpar Guru (Dr) Jayant Athavale (3.1.2014)**

## Index

<b>Chapters</b>	
1. Obsession and Compulsion	10
2. Hallucinations	41
3. Thoughts about suicide	55
4. Manic Depressive Psychosis	58
5. One and the only example of drastic change in personality within seven weeks!	77
6. Permanent solution to all problems - Spiritual practice!	81
